◆ Applications

This hand press is mainly used for the processes of the small workpressing and bending , installation and taking apart.

Before to use it , use the bolts to fix the base on the table . And then adjusting the height of the header according to the work-piece height.

(loose the bolts first, so the header can be moved up and down , after reach the right height, then light the bolts.)

Put the workpiece on it , and then twin the handle to work on the workpiece with pressing , bending , installing as well as taking apart jobs .

Sometimes, when pressing and bending workpiece, it may need a mould which can be fixed on the rack and base, after put the mould on the machine , then can work on the piece with pressing and bending jobs as before.

Parts List

PART#	DESCRIPTION
1	Spring
2	Support Bar
3	Adjust Sleeve
4	Screw
5	Nut
6	Flat Plate
7	Bolt
8	Rack
9	Front Cover Plate
10	Screw
11	Cover Plate
12	Base
13	Venticle Colum
14	Handle
15	Gear
16	Screw
17	Screw
18	Header
19	Screw
